How can I calculate my Sum Assured?

In case of your death, your family or loved ones would receive either the Sum Assured or Cash Value, whichever is higher. You can compute your sum assured as shown in the below example.

Example: You have a policy with an annual premium of Rs. 100,000 and a cover multiple of 10

Sum Assured= Annual basic premium x Cover Multiple *
= Rs. 100,000 x 10

* (offered from 5 to 254), the range of cover multiples available to the policy holder varies with the age at entry of the life assured.

How do I determine the Cash Value?

Cash Value = Number of units in your Unit Account x Applicable Unit redemption price

Example: The number of units in your unit account is 1,000 and the applicable unit redemption price is 800:
= 1,000 x Rs.800/unit
= Rs. 800,000 is the Cash Value

- Full Policy Surrender** - At time of surrender, you will be paid in the full the Cash Value of your fund. However, surrender during early policy years may result in lower Cash Values.

Jubilee Secure Savings Plan allows you to invest all extra funds available with you at any time during the term of the policy and top up your regular investments.
